

# Advanced Job Management

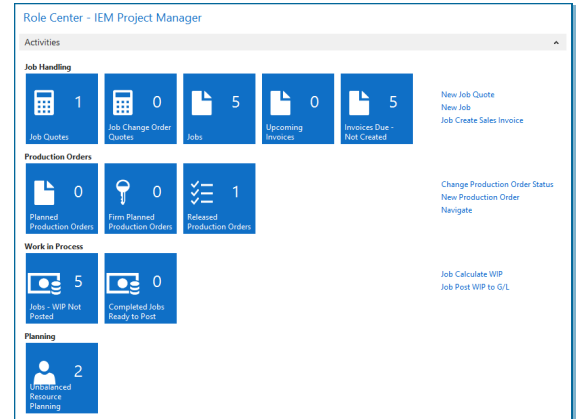

## FOR MICROSOFT DYNAMICS NAV

### Imagine managing projects accurately without the headaches.

Companies focusing on projects must manage huge demands on their organization and resources. In this complex environment, enabling instant insight into the cost and time involved in projects can be a major challenge when project data and documents are scattered and isolated instead of stored in a centralized location.

### All areas of the business are easily accessible.

Advanced Jobs “speaks” to sales, purchasing, inventory, warehouse management, manufacturing, and service management so there is no disconnection.

### No more challenges with silos of information – it’s all in one place.

**Always know the timeline** of your project by using a visual job planner.

- Use the Resource Board to visualize resource assignments
- Plan resource activities where they belong- manufacturing, projects & service
- Use the power of Dynamics NAV to drill back to the source documents for a complete view
- Work with centralized, organization-wide data

**Stay within budget** by comparing budgeted, actual and forecasted costs.

**Capture all revenue** by invoicing change orders immediately.

**Spot bottlenecks** before they occur by easily monitoring job progress.

**Get a complete picture** of the impact on pricing, sales, manufacturing, and warehouse management so you can plan & track logistical demands.

**Achieve more accurate balance sheets** by consuming job-specific inventory when it is actually used or delivered.

**Generate purchase requests or orders** directly from the job to get the best price from the right vendor

**Satisfy complex invoicing requirements** to meet all your client’s needs:

- time & material
- fixed prices
- invoiced in stages
- based on actual deliveries
- internal projects with no billing

### Impactful results that improve your bottom line.

For over 30 years, Western Computer has designed and implemented business solutions that work well for a wide array of industries. Over 160 resources across North America provide deep knowledge that is unmatched for Distribution, Manufacturing, Advanced Jobs, Rentals, and many more.
