

Rework Module

Control outside vendor item modifications within Microsoft Dynamics NAV

The Rework Module from Western Computer is a Microsoft Dynamics enhancement that tracks when an outside vendor is used to modify or enhance an inventory item. The module handles rework activity by a vendor that either increases

a fait - Resert Coler - 6400018

the cost of the item modified or creates a different or new item. For example, a new item with a new price is created when a stock item is sent to a vendor for plating.

The Rework Module process allows that cost to be added, a purchase order to be created and linked, and the accounting to be tied together through the rework order. Kitting is used in the case of "creating" an item that is different from the original. The original item(s) will be consumed, rework charges added, and the new or different item will be "produced" or output.

Handle the Rework Process from start to finish

Use the Rework Role Center menus and shortcuts to access many of the orders and documents needed to complete the rework process.

Create a new rework order from the rework list, the item or a sales order.

Automatically create a purchase order with item charge lines from the rework order.

Create the needed transfer order(s) and purchase orders automatically for the rework location (the vendor).

The finished reworked products can be sent to the originating location, another location, the customers or another rework location (for further processing).

Allows for the pre-configuring of the item(s) to be used [consumed], the treatments, fees, or processing [rework charges] that produce the finished item [output].

When the finished product is shipped directly to your customer from the vendor, there is one charge on the sales line.

Learn more about the Rework Model from Western Computer

For over 28 years, Western Computer has designed and implemented business solutions that work well for a wide array of industries. Accounting Today named Westen Computer #15 of 100 of the most powerful Top Accounting Resellers in 2014.

See what a world class Rework solution can mean for your business.
